Risk and reward profile

- This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of the fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains.
- The lowest number on the scale does not mean that a fund is a risk free investment.
- The Fund has been classed as 2 because its volatility has been measured as low.
- The risk and reward score is not guaranteed and may change over time.
- Risk category may not be a reliable indication of the future risk profile.

The risk and reward indicator may not adequately capture the following Fund risks:

- Bond values may decrease when interest rates rise.
- Bond issuers may fail, resulting in losses to capital values and income.

Material Risks

- Please note that the Fund does not partake in any derivative activity.
- The Fund will invest in other funds; it will indirectly bear the fees of these underlying funds. The Fund may be subject to valuation risk due to the manner and timing valuations of the Fund's investments.
- The Fund invests in REITs. will be subject to risks associated in real estate, fluctuations in properties, payment defaults, market saturation, decrease in rents and other related factors in property markets.
- Credit Risk – no sub investment grade (below BBB-) are permitted and at least 55% of the fund must have a credit rating of A- or higher.
- Counterparty Risk – the maximum amount invested in any one counterparty, excluding governments, is 10% of the Fund's NAV. The sum of all counterparties where the total holding is greater than 5%, excluding governments, must not exceed 40% of the Fund's NAV.
- For full details of the fund's risks, please see the Prospectus which may be obtained from the address in 'Practical Information' overleaf.
